

How to measure your pet for travel:

Step 1:

Gather a tape measure, scale, pen & paper.

Step 2:

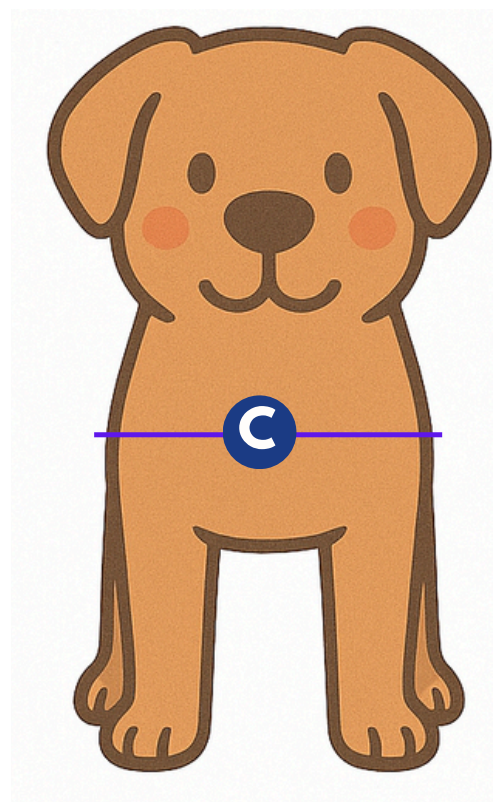

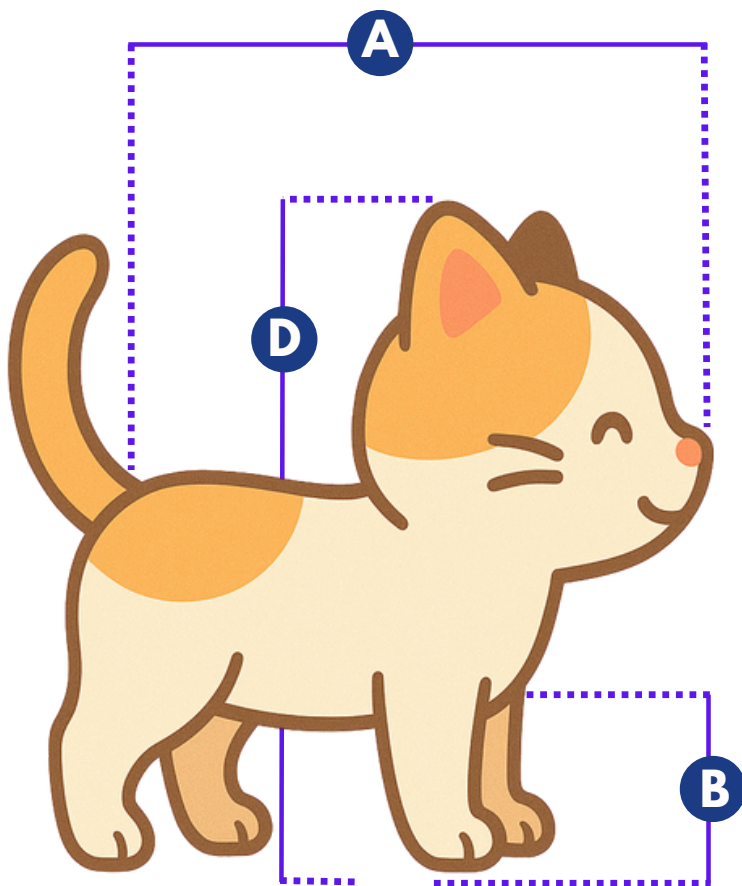

In a **standing upright** position, here are the four points to measure in CM's:

A: tip of the nose → base of tail (*do not include tail*)

B: from the ground → elbow joint

C: width at widest point (*across shoulders or widest body point while standing*)

D: height in a natural standing position from the floor to the top of the head **or** the ear tip (*whichever is higher*)

Step 3:

Place your pet on a scale, and measure the weight in KG's.

If your pet is too large to fit on, maybe a trip to the vet is needed.
